Greetings,

Please see the attached EER Certification.

Docket 18-1034 for Whitley Solar needs to be corrected so that the Rated Capacity on the application matches the Total Solar Output on the Interconnection Agreement. Please file the revision to Delafile so that we can process your certification.

***Please note the Following:**

3.1.5 If an Eligible Energy Resource, once notified by Commission Staff, fails to provide the required documentation or missing information within 60 days of the date of such notification, the Application will be dismissed and must be resubmitted.
